Product Recall Policy

Purpose

This policy defines how Harbor Fresh Markets removes unsafe products from sale. It applies to all 42 stores and both distribution centers.

Recall Classes

A Class I recall involves a reasonable probability of serious health consequences. Class I products must be pulled from shelves within 2 hours of notification. A Class II recall must be completed within 24 hours. Class III recalls must be completed within 72 hours.

Current Recalls

As of June 2026 the following SKUs are under active recall: SKU HF-1042 Organic Baby Spinach 10oz (Class I, possible Listeria), SKU HF-2210 Almond Butter 16oz (Class II, undeclared peanut), and SKU HF-3307 Frozen Mango Chunks 32oz (Class II, possible Hepatitis A).

Customer Refunds

Customers returning recalled items receive a full refund without a receipt. Refunds for recalled items are issued in the original tender when possible, otherwise as store credit.
